RMS & QCS Programs

Resident Management System (RMS)

*The RMS Program **used by Government QA Personnel** to support Construction Quality Management and Administration.*

Quality Control System (QCS)

*The QCS Program **used by Contractor QC Personnel** to interface with the RMS program for both contract administration and quality control requirements.*

Why QCS?

- Required by contract specifications
- *Efficient Electronic Exchange of Information between Contractor and USACE*
- *Eliminates or reduces the need for multiple ways of handling information*
 - *Submittals*
 - *RFIs*
 - *QC Reports*
 - *Manhour Reports*
 - *Deficiency Tracking*
 - *Etc.*

Resources

- Local USACE Resident/Project Office
- <https://www.rmssupport.com>
 - *User Guide*
 - *QCS Software*
 - *SDEF Software*
- *RMS Center of Expertise*
 - (760) 247-0217
 - Fax: (760) 247-2547

QCS is set up to be used for multiple contracts. It has also been revised so that it can be used at multiple locations with division of responsibility. For example, the home office can do payrolls and insurance, the field office does submittals and QC Reports, and the Project Manager does schedules and partial pay estimate. Information can be passed between the various sites and to USACE from the various sites. See the QC Manual for setting up multiple locations.

The U.S. Army Corps of Engineers is a diverse workforce of professionals. Our mission is to provide quality and responsive engineering services to the nation. History and Leadership help us meet the demands of changing times. We are a vital part of the Army. We take pride in our work!

Construction is what the U.S. Army Corps of Engineers is all about. Construction is the reason for our existence, whether the project is for Military, Civil Works or Work for Others.

The RMS Center is maintained to assist field engineers, inspectors, construction representatives, contractor staff and office personnel perform their duties by providing computer programs and automation expertise to plan, accomplish, and control the daily technical and administrative functions of construction projects managed by the U.S. Army Corps of Engineers.

The Resident Management System (RMS) and the Quality Control System (QCS) are quality management and contract administration programs designed by Resident Engineers. The systems provide an efficient method to plan, schedule, and control all aspects of construction.

The Government Staff will use the RMS program and the Contractor Staff will use the associated QCS program.
